

Real-time parking performance report

Detailed analytics with DIY custom reports

White labeling on brand requirements

Automated report scheduling of data

A Data Analytics Powerhouse for Parking

GMP IQ is designed to help operators manage bulk data, gain actionable insights from customized reports and improve their operational efficiency. GMP IQ provides detailed qualitative and quantitative data along with a user-friendly analytical tool, through a custom branded, easy to use web interface. The solution comes with multiple tools to operate, manage, and analyze your parking operation remotely.

Features

- Monitor your locations through a user-friendly admin dashboard
- Comprehensive analytics with actionable insights for operators
- Transparent access to your parker's transaction details
- Plan and create custom offers and promos for parkers
- Automated bulk generation of customized reports
- Secure and remote access to your parking data

Trusted By Market Leaders

An operator wanted to view their customer reports and data on streamlined dashboards. GMP IQ delivered a master dashboard for reports on all their parking data. The quick generation of bulk reports, robust user permission hierarchies and data integrations with third party apps and access equipment were some of the features that impressed the operator.
