

The Parking AI

AVA is a growing ecosystem of AI agents built specifically for parking operations.

Combining conversational intelligence, computer vision, and automation, AVA helps operators work smarter, resolve issues faster, and deliver better parking experiences.

Bringing AI Into Every Parking Interaction

Bringing AI Into Every Parking Interaction

Parking teams are expected to do more with less while delivering better experiences and operational efficiency.

AVA bridges that gap with AI-powered agents that bring parking-specific intelligence, transforming operational data into actionable guidance and support.

Designed With Parking in Mind

Parking-Specific Intelligence

Built around real parking operations, workflows, and customer interactions.

Context-Aware Analytics

Understands operational data and delivers meaningful insights.

Flexible & Trainable

Adapts to location-specific policies, rates, permits, and procedures.

Human-Connected

Smartly escalates issues to support teams whenever human assistance is needed.

Revenue Leakage Control

Reduces inconsistencies and missed opportunities that may affect revenue.

Action-Oriented

Answers questions, helps execute tasks, troubleshoots, and advances operations.

**And More Coming Soon!*

❖❖ One AI Platform. Multiple Specialized Agents.

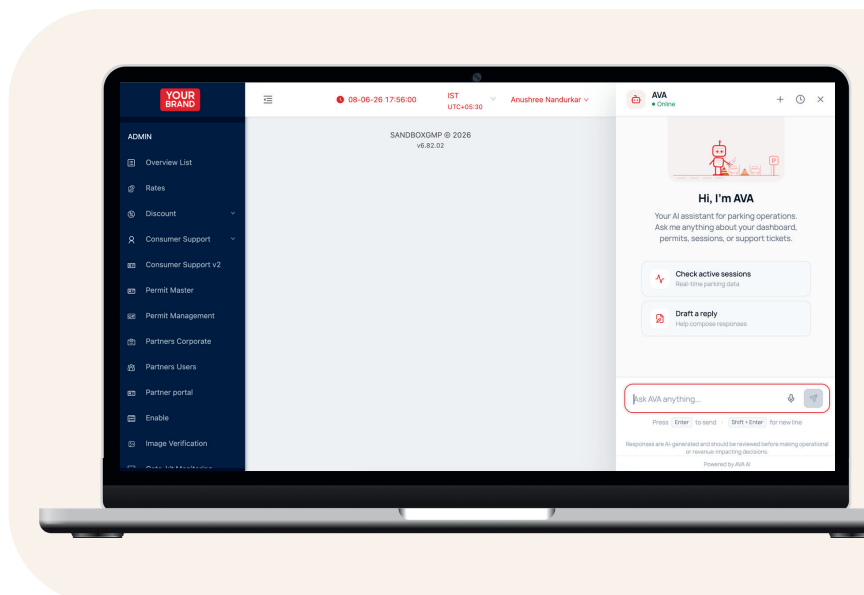

Meet the AVA Agents

❖❖ | **AVA** Ops Agent

Operations Intelligence

AVA Ops Agent is an AI-powered co-pilot that simplifies parking management and accelerates daily decision-making.

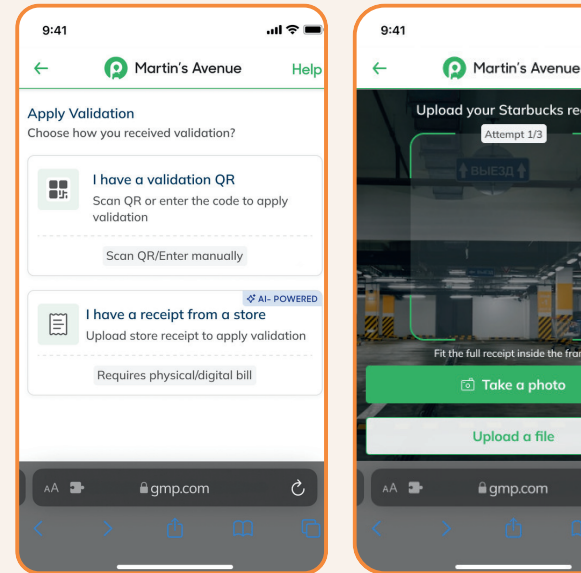

- Troubleshoot operational issues
- Investigate sessions, permits, and payments
- Get answers about parking operations and data
- Guide users through workflows and setup
- Navigate the platform and draft support communications

Receipt Validation

AVA Snap Agent simplifies receipt-based parking validations through AI-powered image recognition.

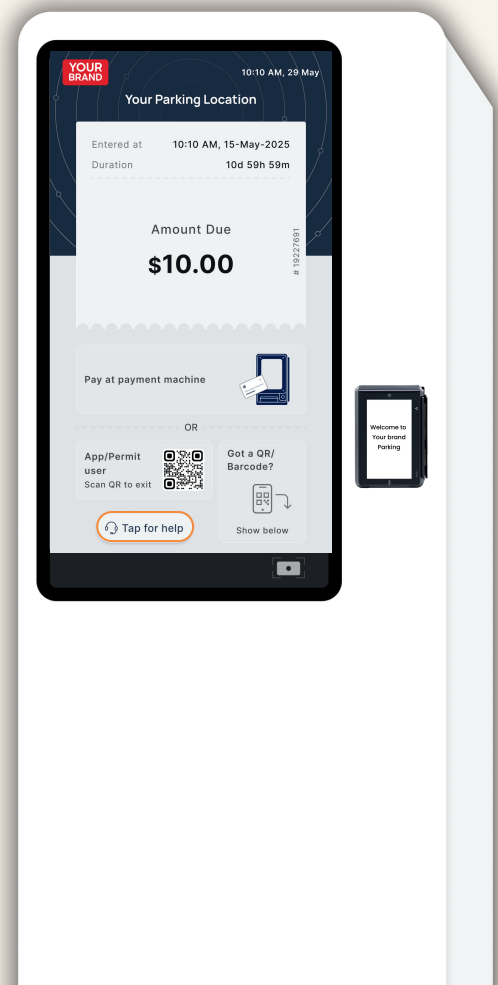

- Validate parking with a simple photo
- Automatically verify receipt eligibility
- Enable self-service receipt validations
- Detect duplicate, invalid, and fraudulent receipts
- Adapt to specific location rules, merchant programs, and regional policies.

Parker Support

AVA Lane Agent helps parkers resolve issues directly at the kiosk through natural conversations.

- Payments, validations, permits, and reservations support
- Rate explanations and cost breakdowns
- Entry and exit troubleshooting
- Multilingual voice interactions
- Escalation to live support teams

Vehicle Recognition

AVA Vision Agent is an advanced computer vision system that automatically identifies vehicles and applies parking benefits, such as license plate-based permits, in real time.

- AI-powered vehicle recognition
- Automatic session matching and recovery
- Continue tracking vehicles when plates are unreadable
- Human-assisted review for unresolved cases
- Match and apply linked rates and permits directly to active sessions.

AVA + GMP

A Smarter Way to Operate Parking

AVA works with the **Get My Parking** platform to transform parking data into action. By combining GMP's operational foundation with AVA's AI-driven automation, operators gain greater visibility, efficiency, and control across their parking workflows.

Driving better outcomes through:

- Smarter operations
- Faster issue resolution
- Reduced administrative effort
- Enhanced customer experiences
- Better operational insights
- More informed decision-making
- Improved performance across locations
