

Gateless AI-PARCS

Set up digital parking in your gateless locations with ExpressLane. Turn parking into a seamless self-serve experience with AI-assisted **Vehicle Matching Technology** for automated ingress/egress and payments.

Achieve 3x faster entry & exit speed!

No tickets, no hassle! GMP AI fixes broken sessions in real-time.

-  Adjusts lighting in pictures in low-light environments
-  Auto-crops plate reads for faster session matching
-  Trained on millions of reads from 1000+ cameras around the world
-  Manual misread correction to train GMP AI

Transcend LPR by recognizing vehicles, not plates.

Deep tech experts train GMP AI specifically for parking, based on millions of images from around the world so that it can identify vehicles by their make and model, not just their license plates. This gives you up to 99.8% LPR accuracy.

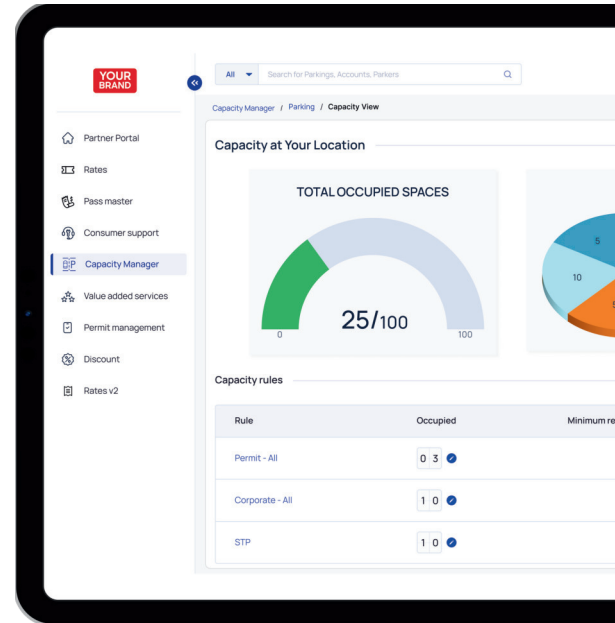

Our team manually fixes the remaining 0.2% sessions, sending feedback to AI for training.
