Launch mobility hub services

Make your Parking for Productive, Profitable and Accessible

GMP LOT comes with an admin dashboard and a consumer app. The centralized dashboard helps operators drive parking operations, with analytical tools to operate, manage, and control parking remotely. The consumer app helps your parkers navigate to your lots, create parking sessions and pay online using their preferred method of payment.

Features

- Retrofit and upgrade your equipment with multiple access methods
- Create a custom-branded cross-platform app for your parkers
- Launch value-added services like EV Charging for your users
- Open new revenue streams with customized partner permits
- Tariff calculation engines to enhance your parking business
- Plan and apply custom promo codes and offers

Trusted By Market Leaders

An operator from Hawaii wanted to provide touchless parking through a custom-branded parking app. GMP LOT helped them set up QR-based entry into their parking lots, with fast and simple deployments that did not compromise on quality. The operator became known for touchless parking in Hawaii, and has plans to expand their business to the mainland.
