Appless, cashless, and lightning-fast parking

GMP QR allows parkers to initiate and pay for their sessions online without having to download an app. Simply scan the QR code, get started with only a phone number and pay online through a custom-branded web app.

Features

- Scan a QR code to pay through the custom branded web app
- Admin portal to monitor parking sessions and transaction data
- Receive session expiry reminders and invoices via text/email
- Reinforcement API that handles overstays and extensions
- Enable promo codes, discounts, and tariffs
- Installation in under 30 minutes

Trusted By Market Leaders

One of the largest parking operators in Florida, USA was asked by their biggest asset owners to enable digital payment methods at their properties through mobile web portals. They wanted the solution delivered quickly within a week with the assurance that the product functioned with reliability and speed at scale. GMP QR was the perfect solution to their requirements and was deployed across their requested portfolio in just 30 minutes per location. Parkers can now pay for their sessions without having to download an app, leading to a smoother and faster parking experience.
