# WHAT IS GMP PERMIT & HOW IT WORKS?

GMP
PERMIT
Take permit business online

An overview: Permit Parking

Parking Permit Management is a digital solution that lets parking lot owners offer their parkers an automated entry & exit without worrying about paying every time.

This solution delivers a touchless parking experience, allowing parkers to drive in and out without stopping, thus saving time and fuel.

What is GMP Permit?

GMP Permit a product, by **Get My Parking**, is an online permit management platform. It integrates with the PARCS System and enables parking operators and parkers to manage all their Permits digitally. GMP Permit comes with two interfaces:

- **A Consumer-facing white-label Web App**
- **A centralized Permit Management portal**

The Consumer Portal makes it convenient for the customers to purchase and manage their Permits on mobile. On the other hand, the Permit Management Portal helps the operators to manage the Permit business operations.

How GMP Permit works?

We have designed a **Web based App** and a **Admin Management portal.** It helps the parking operators to boost their permit services. The parking operators can define the specification of the consumer and admin portal. It not only assists the operators in managing the Permits but caters to their consumers.

Admin

- The Permit Management portal allows the Admin to manage all the Permits.
- The admin can produce flexible Permits ranging from an hour(s) to year(s).
- The option of creating direct sales Permit or Approval-based Permits.
- The admin can onboard new permit users through the portal.
- It helps to keep track of all the permit activity under one user.
- One dashboard a single portal to manage all the permit data.
- The alternative of choosing online and offline payment methods.

Consumer

- A White-label web app to buy Permits for the consumers.
- The web app increases the reachability for permit users.
- It makes permits discoverable and real-time availability.
- It lets the consumers easily compare the Permits.
- The consumer can track all the permit activities.
